

KABIR KAMAL AHMED BAGALKOT

Pune, Maharashtra, India | +91 7666007228 | kabirbagalkot99@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

IT professional with 2+ years of experience spanning secure application development and operational/process review work across multiple client industries. Now focused on IT General Controls (ITGC), IT operations, IT risk and cybersecurity. Practical exposure to access control and segregation of duties review, change management, system & network monitoring, log analysis, and compliance documentation, gained through enterprise application work (JWT/RBAC access controls, ZATCA Phase 2 regulatory compliance) and through a self-built SOC home lab covering SIEM monitoring (Splunk, Wazuh), MITRE ATT&CK-mapped incident investigation, and network traffic analysis. Comfortable reviewing controls, documenting findings, and communicating risk to both technical and non-technical stakeholders.

CORE COMPETENCIES

- **IT General Controls (ITGC):** Access Management & SoD Review, Change Management, Backup & Recovery and Compliance Documentation
- **IT Operations & Support:** System & Network Monitoring, Incident Logging, Ticketing & Escalation, SLA Management
- **Data Management & Compliance:** Data Loss Prevention (DLP), Regulatory Compliance (ZATCA Phase 2), Data Handling & Archival Practices
- **Cybersecurity:** SIEM Monitoring (Splunk, Wazuh), Log & Event Analysis, MITRE ATT&CK, Network Traffic Analysis (Wireshark)
- **Infrastructure & Tools:** Windows/Linux Logs, TCP/IP, RBAC/JWT, Python, Bash, API Integration, OWASP Top 10
- **Process & Communication:** IT Risk Assessment, Root Cause Analysis (RCA), Process Improvement, Cross-Functional Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer | Simple Accounts – Data Innovations & Technology **Sep 2023 – Oct 2025**

Pune, India

- Configured and enforced access controls (JWT, RBAC) within the application layer as part of data loss prevention efforts, reducing unauthorized access vulnerabilities by 35% and supporting segregation of duties objectives.
- Monitored application logs and system events to identify anomalous user behaviour, supporting timely detection, escalation, and documentation of suspicious activity in line with operational control practices.
- Investigated 50+ security and operational anomalies end-to-end, assessing risk impact and likelihood and recommending corrective/preventive controls.
- Contributed to ZATCA Phase 2 regulatory compliance by implementing secure data handling practices and policy-based access controls across data pipelines, supporting secure data pipelines and internal control objectives.
- Collaborated with cross-functional stakeholders to remediate findings, update operational playbooks, and strengthen overall control and security posture.

Process Executive | Infosys BPM

Feb 2022 – Aug 2023

Pune, India

- Performed operational and process reviews for clients across multiple industries, investigating 1000+ data and process anomalies using structured analysis workflows.
- Automated reporting and compliance documentation, improving operational efficiency by 30% and enabling data driven risk assessments across engagements.
- Collaborated with team leads and cross-functional stakeholders to resolve incidents within SLAs and documented findings clearly for leadership and compliance review.

HANDS-ON SECURITY & CONTROLS PROJECTS

SOC & Insider Threat Detection Home Lab | VMware, Splunk, Wazuh, Kali Linux, Metasploitable 3

- Designed and deployed an enterprise style SOC environment with centralized log ingestion (Syslog → Splunk) and custom dashboards/alert rules to monitor data exfiltration, privilege misuse, and unauthorized access patterns.
- Simulated 10+ attack scenarios mapped to MITRE ATT&CK (Brute Force T1110, Reconnaissance T1046, Lateral Movement T1021), investigating each as a structured incident with documented findings.

- Detected 500+ failed SSH login attempts; correlated events in Splunk and validated via Wireshark packet analysis, escalating findings with a documented risk assessment and remediation recommendations.
- Identified network reconnaissance activity via packet analysis and produced a structured incident report with behavioural indicators, risk impact, and recommended preventive controls.

EDUCATION & CERTIFICATIONS

- MBA – Artificial Intelligence & Machine Learning (Online), D.Y. Patil College of Technology, Pune (2024 – Present; Expected Completion: August 2026)
- Bachelor of Commerce, Savitribai Phule Pune University (2017 – 2020)

PORTFOLIO

Detailed write-ups of projects, tools, and solutions referenced above (SOC home lab architecture, incident investigations, dashboards) are available at:
